This debate stirs deep emotions, engaging not only contemporary revisionist scholars but also ancient believers who once upheld the traditional view of the universe.
They argue that our current understanding, even with advances in Quantum Mechanics, may merely be an elaborate illusion—a simulation crafted to confine us within a prison-like matrix.
This matrix, they claim, subjects souls to countless cycles of reincarnation, with only a select few managing to break free from its grasp.
My ability to engage in discussions on this topic stems from my direct access to various textbooks currently used in public schools throughout the lower realms of the Multiverse.

Additionally, my experience as a junior apprentice to the esteemed Miss Wanda, a refugee from the 8th Sphere of the Multiverse, has further enriched my understanding, as she frequently addressed this very subject.

In a complex and often misunderstood chapter of early Multiverse History, ancient biblical scholars from the planet commonly known as "Earth" confronted issues strikingly similar to those we face today.

These scholars, who had closer access to the original texts, recognized that the narrative endorsed by the Council of Bishops at the Council of Nicaea was significantly distorted, influenced more by political maneuvering than by genuine biblical truths.

As they delved into the origins of our universe,

they discovered that the accepted story was a chaotic blend of fanciful myths and outright fabrications, a concoction that remained largely unchallenged even by many contemporary scientists.

Through careful examination of the nature of reality, I have reached the conclusion that the ancient Coptic Brotherhood, armed with texts that predate the resources available to contemporary biblical scholars, possesses a unique moral authority to assert *"I told you so!"*

This assertion comes in light of their historical persecution, which nearly led to their extinction, all because of their commitment to preserving an authentic narrative of existence. Their focus on the intricate web of souls and the historical accounts of Yaldabaoth and his

associates, the Archons, underscores the Coptic Brothers dedication to truth in a world often shrouded in misunderstanding.

Long before the core religions of our world fell under the sway of the corporate machinations of the Roman Empire's Deep State, there existed a profound understanding that our reality resembled a poorly executed play.

In this ancient perspective, humanity was often relegated to the status of minor characters or, in unfortunate cases, mere extras with little significance to the overarching narrative.

This bleak acceptance of our roles stemmed from a lack of proper agent representation or an actors' union to advocate for our rights, leaving us to navigate a world where our contributions seemed inconsequential in the

grand performance of existence.
Contemporary scholars and truth-seekers have increasingly voiced their concerns regarding the conventional narratives surrounding the universe's creation, often influenced by access to obscure historical texts.
As a proud graduate of the Mystery School of Alexandria's Home Study Course, I find myself intrigued by claims from certain undisclosed scholars suggesting that these ancient documents, may even predate Enoch, trace back to the era of the First CIS Humans or possibly earlier.
However, the restrictive "reserve only" status of these texts in the Mystery School's vast library prevents any external validation, leaving their contents shrouded in mystery and speculation.

In today's climate, it is nearly impossible for reputable scientific authorities to publicly express skepticism about the notion that the world was created on October 23, 4004 BC, a date derived from Archbishop James Ussher's biblical calculations.

This belief continues to be upheld by various fundamentalist groups and traditionalists, who find support from established church hierarchies that have historically endorsed similar timelines.

These institutions often align themselves with Ussher's findings, suggesting that they, too, have conducted their own calculations that yield comparable dates, albeit with minor variations.

Few have dared to question the deeply ingrained beliefs surrounding our pre-history,

as doing so often invites swift retribution from those in power.
The risks involved can be severe, leading to career setbacks or even life-threatening consequences for those who challenge the status quo.
Historically, this suppression of dissent mirrors the fate of heretics in the past, who were executed for seeking truth, much like today's truth-seekers like the Jesuits of Truth, who face similar backlash.
The church, a bastion of oppression for such truth seekers, thrived on the financial support of the masses, allowing its leaders to enjoy lavish lifestyles of the "Rich and Famous" while dismissing revolutionary ideas, such as the notion that the Earth is not the center of the universe or that Little Joey Buyhim didn't

lounge lizards trying to sell them fake Viagra—are met with rejection at the so-called "Heavenly Gates."

They may enjoy brief reunions with long-lost relatives who conveniently overlook past grievances, and perhaps even a fleeting audience with God or Jesus, assuming divine schedules allow for such encounters amid the chaos of earthly calamities.

However, what truly troubles me is the authenticity of this experience.

Is it genuinely a passage to the afterlife, or merely a psychological operation designed to instill a false sense of security?

When the celestial powers or a beloved deceased relative insist that one must return to fulfill unfinished tasks, it raises unsettling questions about the nature of existence.

Are you simply being sent back into a carefully constructed matrix, one that serves to harvest your soul for the benefit of Yaldabaoth and his Archon minions?

The essential takeaway from this situation is the choice to accept what the Archon claims is a divinely sanctioned opportunity—a chance to rectify or erase the wrongs of your current existence.

However, their assertions hold no more truth than the fanciful tales of Little Joey Buyhim's hairy legs; it's merely a manipulation designed to instill guilt and entice you into seizing that offered chance to amend your past actions or improve your Heavenly Social Credit Score.

They will present this with unwavering confidence, insisting that your score directly influences your afterlife living conditions,

determining whether you reside in a luxurious mansion in a prime heavenly location or a dilapidated shack behind a sewage treatment facility.

Campers, it's important to clarify that the claims being made are far from accurate, especially considering the current scarcity of mansions in modern-day Heaven.

Stand firm in your truth and express your satisfaction with your journey, including the mistakes that have shaped your identity. Emphasize that you embrace your free spirit and wish to speak with their manager, subtly hinting that their aggressive sales tactics could lead to a less-than-favorable review on Yelp. This approach should effectively address the situation.

Your initial mistake was getting distracted by

the tunnel adorned with its flashy Vegas-style lights.
Seriously, avoid that temptation!
Instead, take a moment to pause, observe the landscape around you, and remind yourself that the voice you hear isn't your beloved grandmother urging you to rush off to meet your high-school crush.
It's merely an Archon seeking to tally up his weekly soul count.
I boldly declared it, my voice trembling slightly, as I pondered the potential repercussions on my social credit score.
Can you hear the rapid tapping of keyboards as more lawsuits and injunctions are drafted, accusing me of breaching “non-disclosure” agreements?
A voice, tinged with urgency and distress,
